REPECHAGE

The diagram illustrates the water flow from the reservoir to the turbines. The reservoir is divided into two pools, Pool A and Pool B, which are connected by a common channel. The flow from the reservoir is split into two paths, one for Pool A and one for Pool B. The flow from Pool A is 38 m³/s, and the flow from Pool B is 35 m³/s. The total flow is 10 m³/s. The head of Pool A is 37m, and the head of Pool B is 34m. The flow from the reservoir is 10 m³/s.
